

PowerBase X1 ZRGP

What is power base X1?

Power base X1 is a lithium iron phosphate battery system produced by Zhongrui Green Energy Technology (Shenzhen) Co., Ltd., which can be used to provide safe, reliable, and stable energy for various equipment. At the same time, the module supports expansion on both capacity and power by multiple parallel uses.

Does power base X1 work with energy storage inverters?

Power Base X1 is compatible well with energy storage inverters. Secure power for your home during grid outages by retrofitting your grid-tied system with backup power using proven ZRGP's solutions. Extra PV power for battery charging.

What are the advantages of power base X1?

It supports CAN, RS485, RS232, WIFI communication, and can meet the requirements of various PV inverter communication protocols. Power base X1 has the advantages of high safety performance, long life span, wide charging voltage range, simple installation, and standard modular design.
