

PowerWall P10B Home Storage Battery

What is a Powerwall battery?

Learn More Powerwall is a compact home battery that stores energy generated by solar or from the grid. You can use this energy to power the devices and appliances in your home day and night, during outages or when you want to go off-grid.

Is the Powerwall 3 a good battery?

The real-world backup window is probably longer than that, because you generally won't draw the maximum amount of power from your battery consistently during a long outage. The Powerwall 3 provides 11.5 kW of continuous power, which is more than double what it used to be, and much higher than many other batteries on the market.

Does Powerwall work if a power outage occurs?

When an outage occurs, Powerwall will help keep your solar system running or, if using grid power, will transition your home to stored energy instantly. With a fully integrated solar inverter, Powerwall can efficiently store solar energy and convert it into electricity to power your home.

How much does a Powerwall battery cost?

Plenty of other popular brands go for \$15,000 total. The Powerwall holds more electricity than those batteries, though (13.5 kWh vs. 10 kWh, typically), and that extra capacity often helps owners offset enough of their nighttime, non-solar energy use to make up the cost difference. The extra energy can be useful in backup scenarios, too.

How does a Powerwall solar inverter work?

With a fully integrated solar inverter, Powerwall can efficiently store solar energy and convert it into electricity to power your home. This means you can capture more of the solar energy your system is already generating during the day and use energy to power your home for free at night. Time-Based Control mode optimizes your stored energy.

How long does a Powerwall 3 battery last?

With the Powerwall 3, that's about 2 hours, depending on the variant. The real-world backup window is probably longer than that, because you generally won't draw the maximum amount of power from your battery consistently during a long outage.
