

Q2000-4102 SPARQ Systems

What is a Q2000 microinverter?

The Q2000 microinverter is the industry's first highest power rating microinverter that produces electrical energy from four photovoltaic ("PV") panels of 550W+ each, without any power clipping under all operating conditions. The Q2000 is designed to connect 4 PV panels, up to 550W, to the AC power grid.

What is the difference between Q2000 and q1200 microinverter?

The Q2000 is designed to connect 4 PV panels, up to 550W, to the AC power grid. The Q1200 Grid-Tied microinverter is designed to connect 4 PV panels, up to 400W, to the AC power grid. The Q1200 Dual Mode microinverter is specifically designed for use in India, and operates both in grid-tied and off-grid modes, with and without home batteries.

How many PV panels can a q1200 microinverter connect?

The Q1200 Grid-Tied microinverter is designed to connect 4 PV panels, up to 400W, to the AC power grid. The Q1200 Dual Mode microinverter is specifically designed for use in India, and operates both in grid-tied and off-grid modes, with and without home batteries. The Q1200 is designed to connect 4 PV panels, up to 400W, to the AC power grid.
