

REVO VM IV Series

What is a Revo system?

A REVO system delivers high performance scanning, non-contact inspection and surface finish analysis on a single CMM. The REVO system uses synchronised motion and 5-axis measurement technology to minimise the dynamic effects of CMM motion at ultra high measurement speeds.

What is the Revo 6?

The Revo 6 is a heating and sensing architecture used in the Revo Six heater, which reaches temperature much faster than a traditional aluminum HeaterBlock. It features a positive temperature coefficient (PTC), making it safer as it can't melt at extreme temperatures, reducing hazards in the event of a thermal runaway.

What is Sorotec Revo Hess?

Sorotec REVO HESS 5.6-8kw Solar Energy Storage System Hybrid Solar Inverter Manufacturers & Suppliers
Model: REVO HESS 4.6-8KW
Efficiency: 93%
Solar Charge Type: MPPT
Max. Solar Charge Current: 120A
Frequency Range: 50Hz/60Hz
All-in-one design modular installation, quick plug connector
battery module removable
With BMS system to ensure high battery life
