Rail-less metal sheet mounting SWT Power

What is a direct mount system?

The direct mount system features four basic components,with nothing larger than the size of a PV module,resulting in easy material management. Features include an integrated Skirt for a secure installation with sleek aesthetics,Universal Mounts that fit module heights from 32 - 40 mm and Links that can accommodate 2 to 4 modules.

How does smart conduit Mount work?

Smart Conduit Mount can be attached to a rafter or directly to composition shingle roofs to run conduit across the roof in any direction. The integrated flashing utilizes our proprietary UltraGrip Technology (TM),creating a watertight seal. Our Junction Box can be deck-mounted or rail-mounted and is specifically sized to house four strings (DC/AC).

What is the difference between module links and RL-U mounts?

Module Links accommodate 2 to 4 modules while providing row-to-row bonding, and feature 5 1/4? of adjustability to avoid interferences. SnapNrack RL-U Mounts feature an exclusive 2 1/2? offset which combines with the Link adjustability to create a system that eliminates use of specialty mounts or disassembly on the roof.

How does the Rockit Mount work?

Featuring integrated bonding pins,the RockIt Mount connects to any RockIt Slide and can be easily adjusted north and south for fast alignment. The fast installing RockIt Coupling is easily attached to the module frame to bridge the gap between modules.
