

SE50K-120K Three Phase with Synergy Technology for Europe SolarEdge Technologies

How many synergy units does a three phase inverter have?

The cables on the right hand side of the Synergy Manager, interfaces the Synergy Manager to the Synergy Unit of the inverter. Models of the Three Phase Inverters with Synergy Technology are provided with either two or three Synergy Units. The following connection description refers to inverter models with three Synergy Units.

What is a synergy inverter?

The inverter is comprised of two or three Synergy unit inverters (depending on the model) accompanied by an external Synergy Manager unit. The Inverter may include two or three Synergy Units, depending on the inverter's model. The Synergy Units are connected to the Synergy Manager via AC, DC and communication cables.

What makes SolarEdge a 360° safety solution?

SolarEdge offers a 360° Safety Solution built on three main foundations: Get Insight. Onsite. The Synergy inverters' innovative Pre-commissioning feature enables easy onsite system validation with full visibility of any wiring, communication, isolation or DC polarity issues.

What wires should be used for a se50k se55k inverter?

For inverter models SE50K SE55K, SE66.6K, SE80K use 9 to 16 mm Use copper aluminum wires with insulation rated for at least 90°C. Make sure to consider the maximum termination temperature at both ends of the conductor and to base the ampacity on the lower value. CAUTION! Over-current protection for the AC output must be provided by the installer.

How does synergy inverter pre-commissioning work?

Onsite. The Synergy inverters' innovative Pre-commissioning feature enables easy onsite system validation with full visibility of any wiring, communication, isolation or DC polarity issues. Know everything is working correctly before leaving the site and well in advance of grid connection. Move faster with identical, lightweight, modular units.

What segments does SolarEdge offer?

a broad range of energy market segments through its PV, storage, EV charging, UPS, and grid service solutions. SolarEdge Technologies, Ltd. All rights reserved.
