

What is the SG3125HV?

The SG3125HV is a flexible inverter solution, available in 6.25MW or 12.5MW. In a 6.25MW setup, two SG3125HV inverters are used to access a three winding transformer, saving on initial transformer, cable, and MV switchgear investment. A 50MW plant requires only 8 blocks. The SG3125HV also boasts excellent grid support functions, including advanced voltage and frequency ride through capability.

What is the Sungrow SG3125HV?

The Sungrow SG3125HV is a utility-interactive inverter released by SUNGROW to interact safely with the grid. It brings benefits to the solar plant with no risk of interaction. Designed with a 10 feet enclosure and effective cooling system, the SG3125HV is featured in the SUNGROW's product line.

What is the maximum power output current for Sungrow Power Supply?

Max. DC short-circuit current Max. AC output current 0.99 / 0.8 leading - 0.8 lagging at night function at night function (optional), L/HVRT, active & reactive power control and power ramp rate control © 2020 Sungrow Power Supply Co., Ltd. All rights reserved. Subject to change without notice. Version 1.6.1
