

SI5000-10000 Smart Inverter Redback Technologies

What is a redback smart inverter?

The Redback Smart Inverter is designed for Australian households looking to invest in solar. Designed and tested in Australia, the single-phase grid-tied solar PV inverter series is affordable yet robust and built to survive in harsh Australian outdoor conditions. In-built Smart Load Control allows relay functionality for a single load.

Should you buy a redback solar inverter?

If you're looking to invest in solar for your home, you can't go past the Redback Smart Inverter. As the name suggests, this smart solar inverter is the smart choice for your home. Reduce your power bills with clean, affordable, renewable energy and get complete insight and control into the performance of your solar system.

Does redback have a Smart Load Control feature?

The Smart Load Control feature is available across the entire Redback range. For more information, please refer to the Installation Guide found in the Redback Portal. The Redback Technologies Smart Inverter is designed in Australia to withstand the harsh Australian outdoor conditions.

What is a 10kW solar inverter?

A 10kw solar inverter is capable of handling daily electricity usage that exceeds 40 kWh. This could be necessary for homes with several family members and lots of high-energy appliances, or businesses with heavy energy needs like multiple workstations, servers, or industrial appliances.
