

SLA Replacement Lithium Battery Suncime

What are SLA batteries?

SLA batteries are known by many names AGM or Absorbed Glass Mat, VRLA or Valve Regulated Lead Acid and Gel or Gelled Electrolyte. We have listed the most common sizes above to help you find the battery that you need.

Do lithium batteries last longer than SLA batteries?

Lithium batteries will last longer than an SLA battery and are not impacted by partial charges. Some claim they'll last 2-3 times longer than an SLA battery though this often depends on the care and conditions. Lithium batteries usually charge faster than lead acid batteries.

Should I switch from SLA to lithium batteries?

Lithium batteries - more cost upfront but will last longer. There may be some additional considerations if switching from SLA to lithium like charge controllers, cranking amps, alternator performance which are all worth taking into consideration when researching your options.

Can a SLA battery be damaged?

Both SLA and lithium can be damaged, the SLA battery is a little more resilient. Lithium batteries will last longer than an SLA battery and are not impacted by partial charges. Some claim they'll last 2-3 times longer than an SLA battery though this often depends on the care and conditions.

Do SLA batteries work in cold weather?

SLA Batteries are a little more resilient when it comes to cold weather charging though performance in cold weather sees Lithium batteries slightly ahead. SLA batteries have been around for a long time. Many people feel comfortable knowing that they will most likely just work.

Where can I find lithium ion batteries?

Lithium batteries can be more difficult to find than lead acid batteries which can be readily found in automotive stores and big box dealers like Walmart or Target. Both Sealed Lead Acid batteries and Lithium-ion batteries are maintenance free. No need to fill water chambers or add chemicals with either.
