

Suniva will begin producing solar cells, the building blocks of solar panels, at its Norcross, Georgia, facility in the spring of next year, the company said. It will have an initial production capacity of 1 gigawatt per year, enough to power about 173,000 homes, with plans to expand. The factory's first phase will create up to 240 jobs.

Under the terms of a three-year sourcing contract, Heliene will produce fully U.S.-made solar modules that incorporate Suniva's domestically made solar cells. Heliene has been manufacturing solar modules in Ontario, Canada since 2010 and in Mountain Iron, Minnesota since 2018.

Suniva is America's oldest and largest monocrystalline solar cell manufacturer in North America. Suniva was founded in 2007, out of one of the world's foremost photovoltaic research institutes, The University Center for Excellence in Photovoltaics at Georgia Tech, and from research sponsored by the U.S. Department of Energy.
