

SolaStrut Pitched Tile Rooftop Mounting System

Can I install a PV system on a tiled roof?

Both systems are available as top-fix and side-fix. In short: the mounting of the rail system on the tiled roof can be done from above as well as from the side. But no matter which of our pitched roof mounting systems for installing a PV system on a tiled or plain tile roof you choose: all systems are particularly easy and efficient to install.

What type of roof mounting system is suitable for a residential roof?

A straightforward system designed for portrait and landscape orientation, SolarRoof(TM) Pro is suitable for most residential roof applications. A universal roof mounting system, SolarRoof(TM) Pro is suitable for most roofs and compatible with most of the framed Solar PV modules on the market.

Can a trapezoidal roof be installed parallel to a strut?

For trapezoidal roofs with a slope of less than 10°, installing modules parallel to the roof may not be ideal for self-cleaning or for maximizing yields. On the other hand, higher loads often make conventional strut-based support unfeasible or expensive.

What are Schletter roof hooks?

Designed to be highly durable, quick and easy to install, and capable of supporting heavy loads, Schletter roof hooks support solar on all common tile types, and feature optimized geometries to prevent and circumnavigate broken tiles. They're also height-adjustable, and available in high-quality aluminum or stainless steel.
