

# Sunny Island 6048-US SMA

What is SMA sunny island?

The SMA Sunny Island features SMA's off-grid technology and a maximum efficiency of 96 percent ensuring peak production, which reduces diesel usage in rural communities. The Sunny Island inverter provides complete off-grid management, as well as intelligent battery management for maximum battery life.

What are SMA sunny island inverters?

The SMA Sunny Island 4548-US and 6048-US inverters are based on proven off-grid technology and feature industry leading power output. A maximum efficiency of 96 percent ensures peak production, which results in reduced diesel usage in rural communities. More flexible sizing allows for simplified system planning.

What is a sunny island 6048-us inverter?

The SMA Sunny Island 6048-US inverter is ideal for off-grid or battery backup operation, scaling up to 23 kW of split-phase continuous power. Easy integration of and robust control features for PV inverters and generators provide for optimal operation with or without grid support.

What is a sunny island 4548-us / 6048-us manual?

o Sunny Island 4548-US / 6048-US This manual must be followed during installation and maintenance. The product is designed and tested in accordance with international safety requirements, but as with all electrical and electronic equipment, certain precautions must be observed when installing and/or operating the product.

How do I connect a SMA communication device to a sunny island?

You can connect SMA communication devices (e.g. Sunny WebBox) or a PC with the appropriate software to a communication interface. You will find a detailed wiring diagram in the communication device manual, the software or on the Internet at [You can incorporate an RS485 communication interface into the Sunny Island.](#)

What is a sunny island inverter & battery charger?

The syntax specified here for menus and parameters applies throughout the entire document. The Sunny Island is a bidirectional inverter (battery inverter and battery charger) for off-grid systems. The Sunny Island supplies loads on the stand-alone grid side and charges the batteries with the energy from grid-feeding units connected on the AC side.

The Multicluster Box for the Sunny Island 4548-US and 6048-US is the ideal solution for the easy installation of off-grid systems up to 100 kW. Two to four three-phase clusters, each with three Sunny Islands, can be connected in ...
