What is a Megapack energy storage system?

Megapacks are designed for large-scale energy storage. Megapacks are used by utilities to replace peaker power plants, which generate energy during periods of peak demand. Megapacks store grid energy rather than generating it from fuel.

Why is Megapack a good battery storage product?

Megapack delivers more power and reliability at a lower cost over its lifetime. Each battery module is paired with its own inverter for improved efficiency and increased safety. With over-the-air software updates, Megapack gets better over time. Megapack is one of the safest battery storage products of its kind.
