Utilitas has reduced the use of fossil fuels in its district heating systems from 100 percent to a third. With the carbon neutrality strategy of "From Low to Zero" developed in 2021, we set ourselves the goal to reduce the greenhouse gas emissions from our activities to zero by 2030 at the latest, and to adapt to the effects of climate change.

The new solar park complements the already existing Väo energy complex of Utilitas, where green energy is produced in two combined heat and power plants, and in one smaller solar park. Next year, both green hydrogen production, fueling station and heat ...
