How big is Vistra's Moss Landing energy storage facility?

IRVING, Texas, Aug. 1, 2023 /PRNewswire /-- Vistra (NYSE: VST) is announcing that it has completed the 350-megawatt/1,400-megawatt-hour Phase III expansion of its Moss Landing Energy Storage Facility, bringing its total capacity to 750 MW/3,000 MWh, the largest of its kind in the world.

What's new at Moss Landing energy storage facility?

The Texas-headquartered integrated utility and power generation company said it wants to add another 350MW/1,400MWh BESS to the Moss Landing Energy Storage Facility in California's Monterey Bay.

Is 2023 a good year for energy storage?

It's been a positive year for energy storage in 2023, with new markets opening up and supply chain bottlenecks and price spikes for battery energy storage systems (BESS) easing, though challenges remain. A roundup of the biggest projects, financing and offtake deals in the sector that Energy Storage News has reported on this year.

Is a battery energy storage system a good investment in California?

After final testing, the BESS was fully energized and certified for market participation by the California Independent System Operator (CAISO) on April 7, 2022. Not only does battery energy storage help integrate renewable energy sources, such as solar, it also enhances the overall reliability of California's ever-changing energy supply.

Why should you invest in energy storage?

“Continued investment in energy storage, like our Moss Landing site, allows us to harness and store a substantial and growing amount of power from intermittent renewables and then deliver that electricity when customers need it most.”

How much energy can a Bess store?

The BESS has the capacity to store and dispatch up to 730 megawatt hours (MWh) of energy to the electrical grid at a maximum rate of 182.5 MW for up to four hours during periods of high demand. The Elkhorn Battery enhances reliability by addressing capacity deficiencies that have resulted from increased local energy demand.

The 150 MW Andasol solar power station is a commercial parabolic trough solar thermal power plant, located in Spain. The Andasol plant uses tanks of molten salt to store captured solar energy so that it can continue generating electricity when the sun isn't shining. [1] This is a list of energy storage power plants worldwide, other than pumped hydro storage.
