

Click on the power station name in the result list and the map will zoom onto the location of the power station.  
Type of data included This map contains locations of Queensland's existing power stations with greater than 5 MW installed capacity with information about fuel type, size (MW), ownership, commissioned date and data source.

Large-scale integration of renewable energy in China has had a major impact on the balance of supply and demand in the power system. It is crucial to integrate energy storage devices within wind power and photovoltaic (PV) stations to effectively manage the impact of large-scale renewable energy generation on power balance and grid reliability.

For more information on energy storage safety, visit the Storage Safety Wiki Page. About the BESS Failure Incident Database The BESS Failure Incident Database [1] was initiated in 2021 as part of a wider suite of BESS safety research after the concentration of lithium ion BESS fires in South Korea and the Surprise, AZ, incident in the US.

The Brendale battery is the most recent in a flurry of energy storage projects announced in Queensland. ... Stanwell last week announced plans to build a massive 1.45 GW/2.9 GWh battery storage system near its coal-fired power station in Central Queensland while fellow state-owned utility CS Energy has outlined plans to build a 200 MW/400 MWh ...

CS Energy is investing in a range of energy technologies to help "firm" renewable energy, create a more flexible portfolio and support the requirements of our customers. This includes grid-scale batteries as well as longer duration firming capacity such as pumped hydro and low to zero emission gas-fired generation.

Supernode is an internationally significant digital infrastructure project combining both critical energy and data storage capacity to be powered by Queensland sited renewable power projects. The unique Supernode site at Brendale is only 30 kms from Brisbane CBD and will intersect the new Torus dark fibre data cable currently under construction ...

CS Energy will install, own and operate the battery energy storage system on Powerlink-owned land. ... of a "battery blitz" announced by the state government in the wake of an explosion at the coal-fired Callide Power Station in 2021 that left nearly 500,000 homes and businesses without power for several hours.
