

What is Ukraine doing to support the energy sector?

Procured and delivered approximately \$23 million of items to support Ukraine's energy sector. This support includes back-up generators; first aid and body armor equipment for utility workers; mobile boiler houses; and miles of piping and associated equipment for heating networks.

Is Russia targeting Ukraine's energy system?

Ukraine's energy system has been regularly targeted by Russia since its full-scale invasion in 2022, with attacks intensifying since the spring of 2024. The targeting of energy infrastructure has had wide-ranging consequences for the provision of energy to Ukrainian households and other consumers.

How will Russia's new energy assistance help Ukraine?

This new assistance is in addition to \$55 million in emergency energy sector support for generators and other equipment to help restore emergency power and heat to local municipalities impacted by Russia's attacks on Ukraine's power system.

Will Ukraine's energy supply be impacted by a cold winter?

While Ukrainians have shown immense solidarity, ingenuity and resilience, and support from Ukraine's partners, including equipment and spare parts, have been instrumental in maintaining a functioning system, the possibility of an even deeper shortfall in energy supply during the upcoming cold winter months presents profound risks.

Are Russian gas metering facilities in Ukraine causing force majeure?

Gas metering facilities on the border between Russia and Ukraine have been in the spotlight. In May 2022, the Gas TSO of Ukraine declared force majeure at the Sokhranivka gas metering station, claiming illegal actions and unauthorised gas offtakes by Russian forces.

How has Ukraine managed its electricity deficit?

The deficit has been managed by Ukraine's state-owned electricity transmission system operator, Ukrenergo, through rolling cuts to supply, limiting electricity provision in the worst-affected regions to a few hours per day.

The Department has launched the third bid round under the Battery Energy Storage Independent Power Producers Procurement Programme (BESIPPPP), calling for 616 MW of new generation capacity will be procured from energy storage, based on the following criteria: Battery Storage Technology for a minimum duration of 4 hours at the Contracted Capacity;

On March 2, the European-Ukrainian Energy Agency (EUEA) held a round table on the topic "The future of

energy storage systems (ESS) in Ukraine". During the discussion, the following issues were considered: the existing legislative framework of ESS, international practices of ESS implementation and recommendations for Ukraine, as well as practical ...

Ukrainian energy suppliers need a constant inflow of spare parts and technical energy supplies of all kinds. Currently, main challenges with the procurement of energy system items are long production times, especially for transformers (partly more than 12 months in the high voltage range) and gaps in compatibility due to different Ukrainian and international grid standards.

The ministry released a statement a day prior to the application window's opening. Energy minister Vladimir Malinov said the investments, worth up to BGN1,153,939,700 (US\$657.4 million) "will guarantee the security and stability of the Bulgarian electricity system." Tender bids must be submitted electronically, with more information available on this portal. ...

The New South Wales Government is looking to boost energy reliability in the state with the release of the largest energy storage tender in New South Wales history. Projects developed through the tender will help ensure a steady and reliable supply of clean, affordable energy around the clock.

De-risking gas storage in Ukraine: the independent technical review of stress-test scenarios for the 2023/2024 winter season ... Educational Needs Assessment in the Ukrainian Energy Sector. Executive Summary. ... Download [PDF] 1; 2; Energy Security Project (ESP) is implemented by Tetra Tech ES, Inc., under USAID Contract No. 72012118C00003 ...

o inconvenient time of tenders announcement (Christmas & New Year holidays); o short time for bid submission (one month from the day of the tender's announcement); o absence of the State guarantees regarding the debt restructuring; o current principles of tariff policy in the energy sector and inefficient Energy market rules;
